

LOCKTrip

0% Commissions on Bookings

LockTrip is a decentralized opensource bookings technology and an integrated marketplace, where hoteliers and property owners can rent their property globally, collect money and manage bookings without paying any commissions to middlemen.

Our Marketplace - <https://alpha.locktrip.com> is the place to book your next trip – a hotel, a private property or even part of a private property.

Decentralized platform, built over Ethereum VM, will be open-source and free-to-use by the public. The marketplace will be web based and integrated to the blockchain

Low Total Supply
only **18.5M LOC**

High Project Potential
\$500 Billion industry

Raised **10,500 ETH**
During The Tokensale

Live Product with
100,000+ Hotels

- Strong Team and the only Project Backed by a President of a Country

- Pure Utility Token with Direct Application on High Value Travel Booking Service
- Alpha Version of Hotel & Properties Marketplace Ready as Soon as Dec 2017
- Signed Agreement with Fantasticstay.com for Adding 10,000 Properties

What problem does LockTrip solve?

LockTrip enters the industry of Online Travel Agencies, dominated by established middlemen like Booking.com and Airbnb.com. Hoteliers and Property owners are forced to use their centralized platforms, paying 10-25% commission. LockTrip is here to remove this commission and add this value to the customers

Property owners will receive their rent money using LockTrip (LOC) Tokens in a transparent, secure, trustless and commission-less way. They will be able to transfer their existing property listings with a single click, add new ones using a user-friendly panel, manage all listings and improve sales with in-depth data dashboards and analytics by LockTrip.

Travelers will be empowered to book the same listings but 10-25% cheaper, thanks to blockchain technology, skipping the online travel agencies as current middlemen.

How does LockTrip work?

LockTrip includes 3 key components:

- HTML5 Web platform and iOS/Android mobile App**
 - A cross-platform end-user application, allowing easy booking of hotels and private properties.
- Centralized Backend**
 - LockTrip backend, keeping records of all listing information and providing insights and analytics for optimization. Easy to use content management system, so property owners can add/manage their property listings on the blockchain
- Decentralized Backend**
 - Property listings on the Ethereum blockchain, containing secured, trustless rules for payment and commitment, allowing all traditional models like non refundable, refundable, deposit guarantees etc. Adding new ones like incentives in LOC tokens for users to leave ratings and reviews

What is the big vision

All humans are citizens of the world and traveling to different locations should become as easy and affordable as possible. Until now, using decentralized architecture to further improve the working models was not possible. LockTrip utilizes the emerging new technology to disrupt a growing industry of \$500bn from its foundation.

Use of LOC tokens

By widely distributing LOC tokens to a global group of participants, Blockchain expects to align interests of hoteliers, private property owners and travelers. LOC tokens will be used to settle all bookings. Traditional means of payment like credit cards will also be supported, but as a secondary option. We hope that we will play our active role in making the world a better place not only by making travel more affordable, but also by helping more people to adopt using crypto currencies and digital assets.

Timeline of Token Sale

- Total Supply: 18.5M LOC
- Raised: 10,500 ETH
- Start of Token Sale – Oct 29 @16:00 GMT
- Closing of Public Sale – Nov 30, 2017 @16:00 GMT
